CAREER OBJECTIVE

Motivated and detail-oriented IT student with a basic understanding of computer networking, operating systems, and cybersecurity concepts. Familiar with fundamental IT support tasks such as system monitoring, troubleshooting, and network basics, and currently developing practical skills through guided labs and training platforms. Actively learning cybersecurity fundamentals alongside core IT concepts to build a strong technical foundation. Eager to begin a career in an IT or cybersecurity-related role where I can gain hands-on experience, improve my skills, and contribute positively to organizational technology and security operations.

EDUCATIONAL BACKGROUND

Bsc. (Hons) Computer Networking and IT Security

Islington College	2023 - Present
London Metropolitan University	
Kamal Marg, Kamalpokhari, Kathmandu	

SLC

Global School of Science	2021 - 2023
National Examinations Board (NEB)	
Old-Baneshwor, Kathmandu	

SEE

	2020
Bright Future Secondary School	
National Examinations Board (NEB)	
Naya-Naikap, Kathmandu	

WORK EXPERIENCE

InRED Labs

July, 2025 - October, 2025

Roles: Offensive Security intern

Responsibilities:

- Participated in offensive security training focused on Linux systems, networking concepts, web application security, and Active Directory environments within controlled lab settings.
- Conducted reconnaissance and vulnerability assessment activities using industry-standard tools and ethical hacking methodologies to identify security weaknesses.
- Assisted in exploitation exercises to validate vulnerabilities and understand real-world attack techniques while adhering to ethical guidelines.
- Completed hands-on labs and Capture The Flag (CTF) challenges using platforms such as TryHackMe and Hack The Box to strengthen practical cybersecurity skills.
- Prepared professional penetration testing reports documenting findings, proof-of-concept evidence, and basic remediation recommendations.

TECHNICAL SKILLS

- **Programming Language:** Python, JavaScript , Java
- **Operating Systems:** Linux (kali), Windows
- **Applications and Software:** Cisco Packet Tracer, Kali Linux, VS Code
- **Networking:** TCP/IP, ICMP, DNS, HTTP/HTTPS, OSPF, VPNs, Fire-walls
- **Security Tools:** Burpsuite, Metasploit
- **Security Concepts:** OWASP Top 10, Incident Response Plan, SSDLC, Business Continuity
- **Language:** Nepali, English

SOFT SKILLS

- Communication
- Time Management
- Team Work
- Active Listening

ACADEMIC PROJECTS

- **Smart Farm – IoT-Based Agriculture System**

Language Used: Arduino, Embedded C

Description: Developed a smart farming system using Arduino and DHT11 sensors to automate irrigation. Triggered water flow based on environmental conditions without cloud integration.

- **Land Rental Management System**

Language Used: Python

Description: Console-based system with automated billing and rental tracking using file handling.

- **Teacher Management System**

Language Used: Java

Description: Object-Oriented application to manage salary and performance records using modular code.

- **E-commerce Website**

Language Used: HTML, CSS, JS

Description: Front-end prototype with multiple pages (home, product listings, product details, cart). Demonstrates layout design, navigation, and clean user interface. Improved skills in structuring multi-page web projects.
